Jeremy Lee

PROJECTS

Possum (11/2021 – Present)

Leading in the design and development of a customisable point-of-sale app which provides a menu ordering, transaction, and sales data visualisation interface. Our vision is to turn an expensive service into an accessible tool that can create efficiencies and grow small businesses. Skills used include self-taught JavaScript, HTML/CSS, ReactJS, Firebase, Git, UML and system design, database management, data visualisation, leadership and timelining.

UNSW Dreams (02/2021 – 05/2021)

Team-based back-end development of a web-based messaging application for university students. Skills used include Python, Pytest, Git, SDLC planning, system design, requirements analysis and construction, deployment, team management and project planning.

SKILLS

Python (most proficient)	SQL	System Design
JavaScript/ReactJS	Git	UML Creation
Java	Kubernetes (e.g. Docker/Rancher)	Debugging
